

Wireless Made Easy

Change your wired system to wireless.

In 30 minutes or less, you can self install a wireless option for just \$820.

Firecom's wireless system is an affordable upgrade that's easy to buy and simple to install.

Convert your system in 3 simple steps.

1. Contact your territory manager.
2. Order a combo pack and wireless adapter.*
3. Self-install in less than 30 minutes.

It's that easy.

*The headset requires a 12-volt power source; charging cable included.

Firecom is the leader in wireless communication for first responders. Our wireless system operates on a proprietary, interference free band. It has over three times the linear range and almost 15 times the area coverage of Bluetooth™.
