

# Blue Hills Fire Department

## Memorandum

Date: February 9, 2009

To: Jack Regier,  
Shipmans Fire Equipment

From: Chief Arthur Gold

Subject: FIRECOM Wireless Headsets

As you are aware of the Blue Hills Fire Department has just recently purchased two (2) FIRECOM wireless head sets from Shipmans Fire Equipment for our tower ladder. The installation and service was beyond expectations. On Wednesday, February 4, 2009 we had a rather large structure fire in a 4800 square foot building that was through roof upon arrival. The FIRECOM wireless heads worked flawlessly. No communications between the pedestal, bucket and fire ground operations were missed. I just wanted to take this time to say thank you and FIRECOM for the great products.
