

# MCLB FIRE Department

## Memorandum

Date: December 5, 2009

To: Brent Hunter  
Fire Comm

From: Captain Albert Rickwalt

Subject: FIRECOM Wireless Headsets

As you are aware of the MCLB Fire Department has just recently purchased five (5) FIRECOM wireless head sets from Fire Comm for our new Truck and Engine. The other sets are to be installed in current equipment on the installation. The installation and service was beyond expectations. We have had great success with the unit installed in the new engine. We drove around the Base on several occasions and were able to get up to ¼ mile . The system worked flawlessly through all obstacles. We have also used the head sets on several emergency calls and has worked great. Thank you for making a product that works so well.
